About this course

GH-900

AI-900

AZ-900

Prerequisites

- Familiarity with integrated development environments (IDEs) and version control systems like GitHub.
- Foundational knowledge of AI and machine learning principles. ✓

Audience profile

- Software developers who want to learn about version control, Git, and GitHub.
- Documentation writers who collaborate on various projects and need to manage changes effectively.
- Teams that work on collaborative projects and need to track changes, manage project history, and facilitate collaboration will benefit from this course.
- Individuals who are new to Git and GitHub and want to gain a solid understanding of their fundamental features and collaborative tools are the primary audience.

Agenda

Git → Linus Thorvalds
Linux
+ Lab

GitHub Foundations Part 1

- 1 Introduction to Git
- 2 Introduction to GitHub
- 3 Introduction to GitHub's products
- 4 Configure code scanning on GitHub
- 5 Introduction to GitHub Copilot
- 6 Code with GitHub Codespaces
- 7 Manage your work with GitHub Projects
- 8 Communicate effectively on GitHub using Markdown

GitHub Foundations Part 2

- 9 Contribute to an open-source project on GitHub
- 10 Manage an InnerSource program by using GitHub
- 11 Maintain a secure repository by using GitHub best practices
- 12 Introduction to GitHub administration
- 13 Authenticate and authorize user identities on GitHub
- 14 Manage repository changes by using pull requests on GitHub
- 15 Search and organize repository history by using GitHub
- 16 Using GitHub Copilot with Python

Let's get to know each other

- Your name
- Company affiliation
- Title/function
- Your experience
- Your expectations for the course

Let's have a great time together

We all contribute to a great class

- Be on time (class hours)
- Be present (avoid mail, calls, side meetings)

9⁰⁰ - 17⁰⁰
11⁴⁵ - 12¹⁵

What you should know about our facilities

- Accommodations
- Internet access
- Parking
- Restrooms
- Emergency

Get the most out of your Microsoft Learn profile

Verify, track, and share your training and certification progress and accomplishments—*all on one platform*

- Claim your achievement code for this course and share you have completed it.
- Access your course material and track progress on your learning activities.
- Share and verify your Microsoft Certifications via email, on social networking platforms, and on your résumé.
- Download and print transcripts and certificates.
- Manage your upcoming activities and certification exam appointments.

GH-900T00 - GitHub Foundations

GitHub Foundations introduces you to the fundamental concepts, features, and products of GitHub. You'll discover the benefits of using GitHub as a collaborative platform and explore its core features, such as repository management, commits, branches, and merging. Through curated modules and hands-on exercises, you'll gain a solid understanding of GitHub's essential tools and be well-equipped to start contributing to projects and collaborating effectively within GitHub.

1. GitHub Foundations - All Modules

🕒 8 h

Course Description

This module provides a comprehensive, hands-on introduction to modern software development using Git, GitHub, GitHub Copilot, and Codespaces. Through eleven cumulative labs, learners progress from the basics of version control to advanced collaboration, AI-assisted development, secure coding, and repository best practices. By the end of the module, participants will have built confidence across the full GitHub ecosystem and gained practical skills for real-world development workflows.

Included Labs

1. Introduction to Git
2. Introduction to GitHub
3. Introduction to GitHub Copilot
4. Code with GitHub Codespaces
5. Communicate effectively on GitHub using Markdown
6. Contribute to an open-source project on GitHub
7. Manage an InnerSource program by using GitHub

Agenda

GitHub Foundations Part 1

- 1 Introduction to Git
- 2 Introduction to GitHub
- 3 Introduction to GitHub's products
- 4 Configure code scanning on GitHub
- 5 Introduction to GitHub Copilot
- 6 Code with GitHub Codespaces
- 7 Manage your work with GitHub Projects
- 8 Communicate effectively on GitHub using Markdown

GitHub Foundations Part 2

- 9 Contribute to an open-source project on GitHub
- 10 Manage an InnerSource program by using GitHub
- 11 Maintain a secure repository by using GitHub best practices
- 12 Introduction to GitHub administration
- 13 Authenticate and authorize user identities on GitHub
- 14 Manage repository changes by using pull requests on GitHub
- 15 Search and organize repository history by using GitHub
- 16 Using GitHub Copilot with Python
