

Module 14

Manage repository changes
by using pull requests on GitHub

PR

Agenda

GitHub Foundations Part 1

- 1 Introduction to Git
- 2 Introduction to GitHub
- 3 Introduction to GitHub's products
- 4 Configure code scanning on GitHub
- 5 Introduction to GitHub Copilot
- 6 Code with GitHub Codespaces
- 7 Manage your work with GitHub Projects
- 8 Communicate effectively on GitHub using Markdown

GitHub Foundations Part 2

- 9 Contribute to an open-source project on GitHub
- 10 Manage an InnerSource program by using GitHub
- 11 Maintain a secure repository by using GitHub best practices
- 12 Introduction to GitHub administration
- 13 Authenticate and authorize user identities on GitHub
- 14 Manage repository changes by using pull requests on GitHub
- 15 Search and organize repository history by using GitHub
- 16 Using GitHub Copilot with Python

Introduction

In this module, you learn how to manage changes to your repository source by using pull requests.

By the end of this module, you'll be able to:

- Review branches and their importance to pull requests.
 - Define what a pull request is.
 - Learn how to create a pull request.
 - Understand the different pull request statuses.
 - Walk through how to merge a pull request to a base branch.
- 

What are pull requests?

- **Purpose of Pull Requests:** Document branch changes and enable stakeholders to review and discuss proposed changes to maintain code quality.
- **Branch Comparison:** The compare branch contains the developer's changes, while the base branch (main branch) is where changes are merged.

What are pull requests? (cont.)

- **Merge Options:** You can merge commits into the base branch, squash and merge to combine commits, or rebase and merge to maintain a linear history.
- **Commit Message and Email:** Enter a commit message if prompted and select the appropriate email address for the Git author.

Exercise - Reviewing pull requests

Pull requests are the foundation of teamwork on GitHub.

Pull request reviews give you the ability to work together and discuss changes specific to a pull request by commenting, requesting changes, or approving.

In this exercise, you will:

- Open a pull request
- Assign yourself
- Leave a review
- Suggest changes
- Apply changes
- Merge your pull request

Summary

In this module, you learned how to manage changes to your repository source by using pull requests.

You learned how to:

- Review branches and their importance to pull requests.
 - Define what a pull request is.
 - Learn how to create a pull request.
 - Understand the different pull request statuses.
 - Merge a pull request to a base branch.
-
